

MOUNTAIN VIEW CORRIDOR

Fun Facts

Initial construction of the Mountain View Corridor (MVC) is underway in Salt Lake County and includes 15 miles of new roadway from 5400 South to Redwood Road (at approximately 16000 South). This new road requires extensive grading and excavation (earthwork), constructing drainage systems, building bridges and structures and laying new pavement. Construction includes:

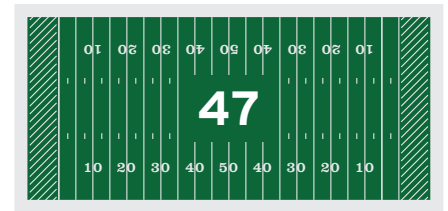

CURB AND GUTTER

30 miles of curb and gutter = more than enough to follow the length of a full marathon

DRAINAGE PIPE

154,920 linear feet of drainage pipe = enough to go around an Olympic track 118 times

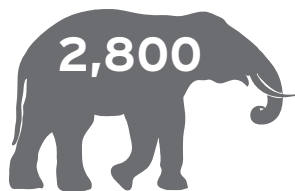

CONCRETE PAVEMENT

300,000 square yards of concrete = enough to cover 47 football fields

EARTHWORK

4,100,000 cubic yards of dirt = enough to fill 1,254 Olympic-sized swimming pools

BRIDGES AND STRUCTURES

3,850,000 lb of rebar + 35,312,652 lb of concrete = the weight of 2,800 African Elephants

ASPHALT PAVEMENT

335,250 tons of asphalt mix = the weight of 8,381 loaded semis
